Education

SUNY at Albany

Bachelor of Science (B.Sc.) – Honors Major: Computer Science | GPA: 3.72

Albany, New York

Expected Dec 2027

University of Western Ontario

B.Sc. – Statistical & Actuarial Sciences, Double Major: Data Science & CS

London, ON

Sept 2023 – Dec 2025

- Black Excellence Admissions Scholarship

Transferred to SUNY Albany

Experience

Software Developer

June 2025 – Sept 2025

Google Summer of Code – Python Software Foundation

Remote

- Defined a portal fix (Django, CI/CD, RBAC) for sponsor onboarding UX and data-entry friction burdening management teams, then built it under mentor guidance - supporting the onboarding of 2 new sponsors
- Streamlined sponsor/volunteer sign-up monitoring for coordinators by building automated notification/media-upload systems (AWS S3, SendGrid).
- Drove a data-tracking fix for sponsor/volunteer management - querying gaps (SQL) and designing a dashboard (Django, Docker) on team feedback – cutting tracking time by 70%, easing coordination and speeding org decisions.

Product Manager

Jan 2025 – May 2025

Western University – Tech for Social Impact Club

London, ON

- Scoped product direction for 2 civic-tech apps serving youth sports and nonprofit organizations, both shipped to real end users.
- Translated nonprofit stakeholder needs into actionable specs for engineers/designers - fixing user-flow and UI issues across both apps.
- Prioritized feature roadmap across engineering/design teams by nonprofit-given priority level, with stakeholder feedback confirming presented solutions met their requirements.

Product & Engineering Fellow

July 2024 – Sept 2024

Headstarter AI

Remote

- Led product and engineering for FinBot, an LLM-powered stock advisory chatbot delivering real-time market insights - scoped the user need, prioritized features against a fixed build timeline, and directed a cross-functional team through launch, placing top 3 of all teams.
- Defined and shipped Pantry Tracker, a consumer inventory app (Next.js, Firebase, Material UI), defining the user problem and iterating based on user feedback.
- Owned end-to-end delivery of both projects from problem definition to AWS deployment, writing specs and user story maps with mentor guidance.

Projects & Involvement

- **UAlbany Shuttle Tracker, Founder – Product & Engineering (Ongoing)** - Surveyed 50+ students (freshmen–seniors) to validate a real pain point, then built a live tracker and trip ranking algorithm weighing wait vs. walk time; targeting Fall 2026 beta and Sept 2026 pitch to UAlbany Parking & Transit.
- **Blueprint Student Club @ UAlbany, Founding President & Product Manager** - Founding a student org building free software for nonprofits from scratch: recruiting a faculty advisor, designing PM/Engineer/Designer team structure, scoping the first client project, targeting Fall 2026 launch
- **Product Teardowns & PRDs** - Authored full product teardowns and PRDs (problem statement, user stories, success metrics) for consumer social features, published publicly.
- **FitFindr (CodePath Applied AI Engineering)** - Multi-tool LLM agent (Groq) for secondhand fashion - matches wardrobe fit, generates outfit cards.
- **Provenance Guard & Guide (CodePath Applied AI Engineering)** Backend API (RAG) classifying text as human/AI-generated with transparency labels and creator appeals.

Skills

Product: Agile/Scrum, Figma, User Story Mapping, Product Requirements Documents, Product Roadmapping

AI/ML: LLM agent design (Groq, tool orchestration), RAG pipelines (ChromaDB, Sentence-Transformers)

Languages: Python, Java, JavaScript, TypeScript, HTML, CSS, SQL, R

Frameworks/Libraries: React Native, Django, React.js, Next.js, Flask, Pandas, NumPy, Scikit-learn

Tools/Platforms: AWS (S3, EC2), Docker, PostgreSQL, MongoDB, Firebase, Slack, GitHub, RBAC
